There have been numerous legislative changes, mass transportation portals, the closing of the AC Jail in Oakland, the opening of the courthouse, just to name a few factors that have changed in the past five years. I have seen a reduction in the amount of force used in the past five years and I directly attribute that to the professionalism of our staff.

1		Collaboration w/Social Workers, Mental Health Providers, and DPS	1/14: Are other communities using social workers who are going out with police officers. What has been the outcome of that?	1/14: Seed will conduct preliminary research on models in other cities (<i>including programs within Alameda County and Bay Area</i>)	Seed	2/11/2021	<p>From Seed: The most comprehensive police social work practice is found in Illinois and Wisconsin. Police social workers are employed within more than 35 police departments and provide a variety of services in response to domestic violence, elder abuse and mental health. A critical incident response is also provided (Services, 2007). These police social workers are also members of the Association of Police Social Workers (APSW). The mission of the APSW is to promote the development and practice of social work services that are provided within police department settings.</p> <p>At the Houston Police Department, a licensed clinical social worker or caseworker rides along when police answer an emergency call regarding a person presumed to be mentally ill. Some 30 of those ride-along professionals now work out of that department's relatively new Mental Health Division.</p> <p>In Wisconsin, the Madison Police Department Mental Health Liaison Program has similar pairings of health clinicians and cops, otherwise known as crisis intervention response teams.</p> <p>The One Mind Campaign seeks to ensure successful interactions between law enforcement and people in crisis and/or with mental health issues or disorders. The initiative focuses on uniting local communities, public safety organizations, and mental health organizations so that the three become "of one mind." To join the campaign, law enforcement agencies must pledge to implement four promising practices over a 12-36 month time frame. These practices include: 1) Establish a clearly defined and sustainable partnership with one or more community health organizations; 2) Develop and implement a model policy addressing law enforcement response to people in crisis and/or with mental health issues or disorders; 3) Train and certify 100 percent of sworn officers (and selected non-sworn staff, such as dispatchers) in mental health awareness courses by: Providing Mental Health First Aid training (or equivalent) to 100 percent of officers (and selected non-sworn staff); and, Providing collaborative crisis response training to a minimum of 20 percent of sworn officers (and selected non-sworn staff).</p> <p>Added 2/15: Health care workers replaced Denver cops in handling hundreds of mental health and substance abuse cases—and officials say it saved lives. https://www.cbsnews.com/cdn.ampproject.org/c/s/www.cbsnews.com/amp/news/denver-health-professionals-replaced-cops-in-handling-hundreds-of-low-level-incidents-for-6-months-and-successfully-did-so-with-no-arrests/#app</p>
