Office: 925-516-8966
Cell: 925-605-9157

Full Trash Capture Manufacturers

The California Stormwater Quality Association (CASQA) maintains a list of [Certified Full Capture System Trash Treatment Control Devices \(https://www.casqa.org/resources/water-quality-priorities/trash/certified-trash-full-capture-systems-available-to-the-public\)](https://www.casqa.org/resources/water-quality-priorities/trash/certified-trash-full-capture-systems-available-to-the-public). Refer to the CASQA list for more information and note the following:

- Selecting a certified full trash capture device must be done on a site-by-site basis. Not all devices will work in all locations. Contact the vendor as part of the project planning effort to verify the selected device(s) will work for your project.
- Take note of any modifications noted by Mosquito Abatement Districts to facilitate access for mosquito abatement.
- Trash capture devices are considered long lead time items. Project proponents should plan accordingly.
